

Main benefits of Ambu ResCue Mask

- The ResCue Mask is transparent to allow visual check of patient's condition
- Head strap for fixation and secure positioning. For use on both adults and children
- Reusable facemask that is easy to clean, which extends the product life
- 100% latex free
- Private labelling available
- Available in softcase

Ambu[®] ResCue Mask

The Ambu ResCue Mask is designed to provide protected rescue breathing for any patient (any age group). In CPR, mouth-to-mouth has been the traditional way of ventilation in an emergency situation. With the Ambu ResCue Mask first responders can provide immediate respiratory support without having any concerns about infectious diseases and the inherent unhygienic nature of the practice thus removing any natural reluctance to carry it out.

Features

The Ambu ResCue Mask helps protect rescuers in an emergency situation. It prevents direct contact with patient's mouth, nose and face and helps overcome hesitation to start resuscitation. The mask is available with and without oxygen inlet. Thus an oxygen tube can be attached to the oxygen inlet for supplemental oxygen. The one-way filter of the mask can be removed in order to use the mask with a manual resuscitator. The Ambu ResCue Mask comes in an original modern shell-shaped softcase.

SIZE

Dimensions	138 mm x 113 mm x 50 mm
Weight	Approximately 110g

MATERIALS

Mask	Polyvinylchloride
Softcase	Polyurethane, Ethylene Vinyl Acetate and Micro Fabric
